

Dear User,

The following information should enable you to work successfully with xmCHART 3.2:

**Requirements:**

Windows XP or Windows Vista

Mac OS X 10.3.9 or higher.

xmCHART 3.2 is fully compatible with FileMaker Pro 8.0/8.5/9.0

FileMaker Pro 7.0 is supported up to xmCHART v3.1

For FileMaker Pro 4.0/5.0/5.5/6.0 xmCHART v2.2 is required.

**Upgrade to xmCHART 3.2:**

All customers who have purchased xmCHART after Sept. 1, 2004 get xmCHART 3.2 for free. All other customers can upgrade to version 3.2 at a discounted price.

**Installation:**

- Quit FileMaker Pro if necessary.
- Copy xmCHART (plug-in) into the "Extensions" folder which is normally located in the "FileMaker Pro" folder.
- Start FileMaker Pro.
- Furthermore, you must make sure that xmCHART is activated. This can be checked in the *Preferences...>Plug-Ins* menu.

xmCHART can also be easily linked with FileMaker Pro Runtime solutions. For this purpose, make a folder named "Extensions" within the folder which contains the FileMaker Pro files for your runtime solution. Then copy xmCHART (plug-in) into this folder. A xmCHART Developer Distribution License is required for runtime solutions.

**Language:**

As the default, the error messages are displayed in English. By calling the external function `xmCH_SetLanguage( )` the language of the error messages can be controlled. Currently the languages, English and German, are supported.

English:        `xmCH_SetLanguage( 0 )`

German:        `xmCH_SetLanguage( 1 )`

Since the language code is neither stored in a file nor in a registry, it is advantageous to call `xmCH_SetLanguage( )` in a FileMaker Pro start-up script . You can define a start-up script under menu item *File>File Options...>Open/Close>Perform script*.

**Support:**

Should problems occur during installation, please send an e-mail containing the following information:

- Platform and operating system version
- FileMaker Pro version
- A description of the error

to: <[support@x2max.com](mailto:support@x2max.com)>. We will make every effort to get in touch with you as soon as possible and find a solution.

Happy charting,  
X2max Software
